

TITANS GLOBAL • THE BRIEF

Forward-deployed AI for the enterprise core.

Elite engineers inside the organization. Shelf-ready systems from day one.

TITANS embeds forward-deployed engineering squads inside large, multi-site enterprises — alongside the CISO, IT leadership and development teams — and deploys a shelf of proven systems in leading Gartner categories: network automation, GPU & compute orchestration, enterprise agents and workforce AI. AI transformation that runs in the field, not in pilots.

Embedded AI Systems
For Every Decision

**70%+**

of a nation's pandemic tests ran on a chain TITANS built and operated

1,200+

edge sites in one command loop — a global multi-site client

-40%

network incidents removed through automation

<60s

request to a live GPU workspace, on any hardware

01 • THE EDGE

Why TITANS gets in — and stays in.

FORWARD-DEPLOYED ENGINEERING

Inside, not beside.

Squads embed with the CISO, IT and development teams, map how the organization really works — and own the outcome.

SHELF PRODUCTS • DAY ONE

Value in weeks, not years.

Proven systems in leading Gartner categories. First Use Case in weeks — then replicated across sites and enterprises.

THE UNDERSTANDING LAYER

Agents that understand first.

An ontology of the organization — people, systems, assets, processes — so agents act on the real business.

SOVEREIGN BY DESIGN

Where the cloud never enters.

On-prem, offline-capable, multi-vendor. Security is a core module — built for regulated, national-scale environments.

02 • THE MARKET

The money is moving from pilots to production.

\$2.7T

worldwide AI spending in 2026 — up 49.5% in one year

GARTNER • SEP 2026

\$1.2T

AI-services opportunity by 2030, driven by transformation projects

GARTNER • SEP 2026

40%

of enterprise apps will embed task-specific AI agents by end-2026 — from under 5% in 2025

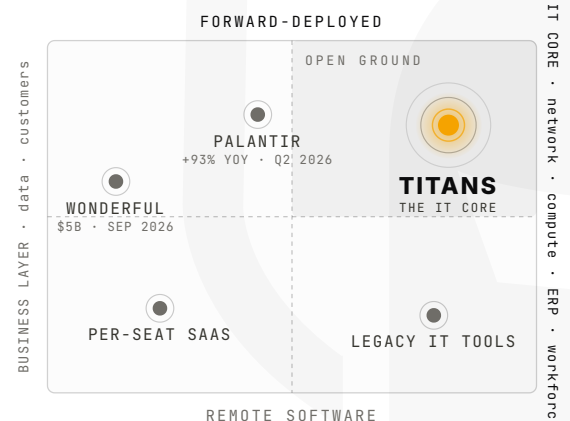

GARTNER • AUG 2025

40%+

of agentic AI projects will be canceled by 2027 — cost, unclear value, risk

GARTNER • JUN 2025

THE ARENA

Same category as the giants. Different ground.

Palantir leads the data layer; Wonderful, the customer conversation. The IT core is still open ground.

Models are rented. **Delivery is scarce.** Postings for forward-deployed engineers rose 800%+ in 2025 — the market now pays for companies that deploy inside the enterprise.

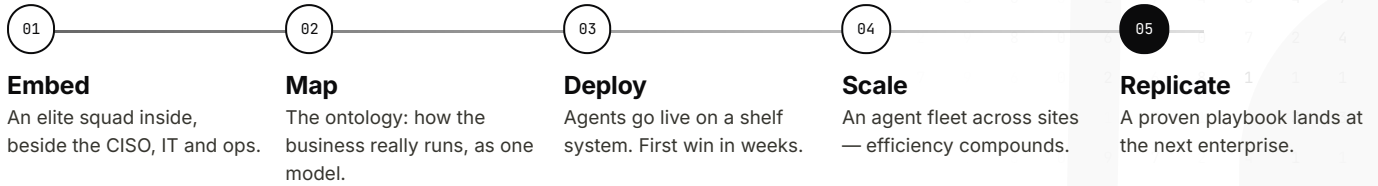

FINANCIAL TIMES • 2025

TITANS GLOBAL • THE BRIEF

titans.global

03 • THE MODEL

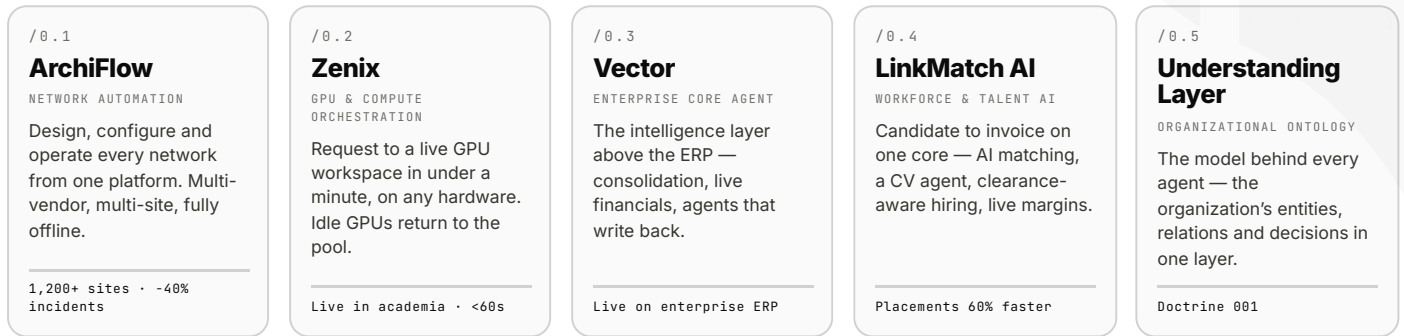

Land in one site. Prove it. Scale to every site.

Services open the door. **Software stays** — every engagement converts into recurring licenses: per site, per device, per GPU, per seat.

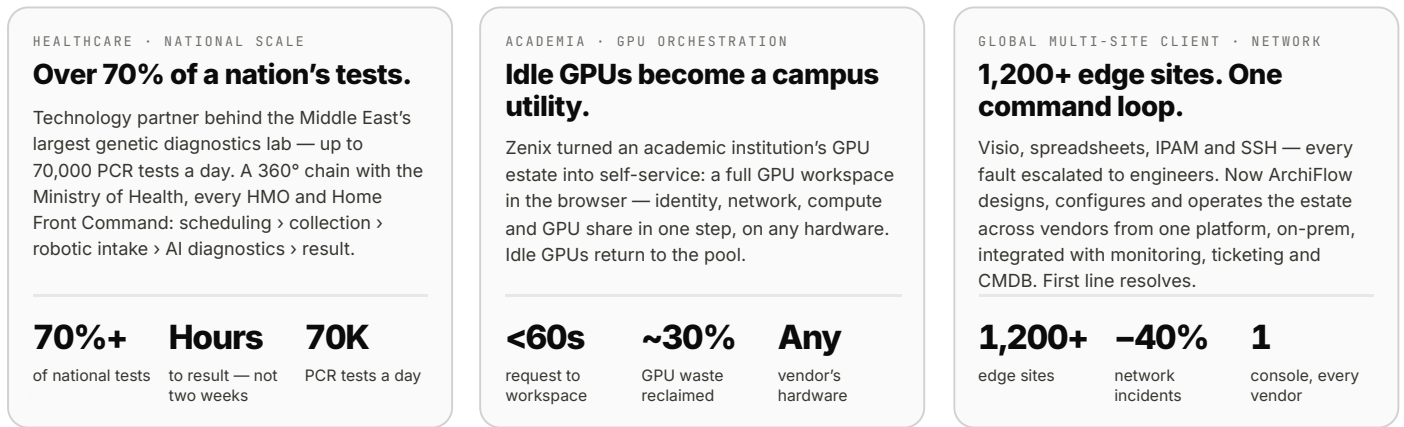

04 • THE SHELF

Ready on day one. Built to lead their Gartner categories.

05 • PROOF IN THE FIELD

National scale. Multi-site. Live.

06 • THE TEAM

An elite unit — not a staffing bench.

Founders from an elite C4I data & cipher unit, with leaders from NVIDIA/Mellanox, HPE and market-leading enterprises. Degrees in computer science, applied mathematics and business. Over a decade in the industry, systems serving millions of end users, hundreds of clients.

FOUNDER • CEO

Raul M.

Cyber & data-ops executive • national cyber advisor

◆ Medal of Appreciation — National Center of Forensic Medicine

◆ Signed references from government & industry leaders

FOUNDER • CTO

Rian T.

NVIDIA/Mellanox • data centers at industry scale

FOUNDER • BUSINESS & FINANCE
